Read in December, 2014

Non-Boring Travel Writing is a great book to read if you're trying to break into writing articles about travel or just improve how you write about your trips. The author clearly has a lot of experience with the subject and she gives lots of examples that have been published in different places, including newspapers and magazines. Lots of tips and exercises to help improve both your writing generally and your chances of getting published (and paid!). Examples include walking around Paris to a trip the author took to Antarctica. Something for anyone wanting to write about travel or improve their travel writing!
